# Policy Directions for the Hyperscale AI Era

October 27, 2023

# CONTENTS

---

- I Rise of Hyperscale AI
- II Status of Hyperscale AI Development
- III Hyperscale AI's Influence
- IV Policy Environment
- V Strengthening Hyperscale AI Competitiveness
- VI AI Normalization among All Citizens

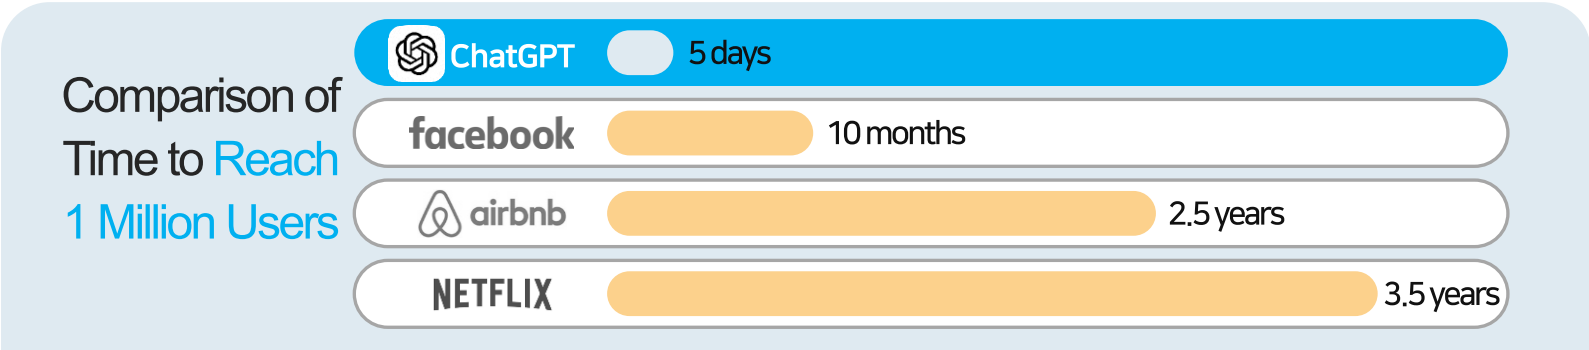

# I Rise of Hyperscale AI

## Introducing ChatGPT

Possesses **creative abilities**, including **interactive search, writing** essays, poems, and novels, as well as proficient **software coding** and debugging.

**Achieved 1 million users in just 5 days** after launch, and **10 million users in 40 days**; significantly shorter periods compared to other major services.

- ☑ Previously vague expectations for AI turned out to be highly useful, marking the onset of a new phase in AI competition.

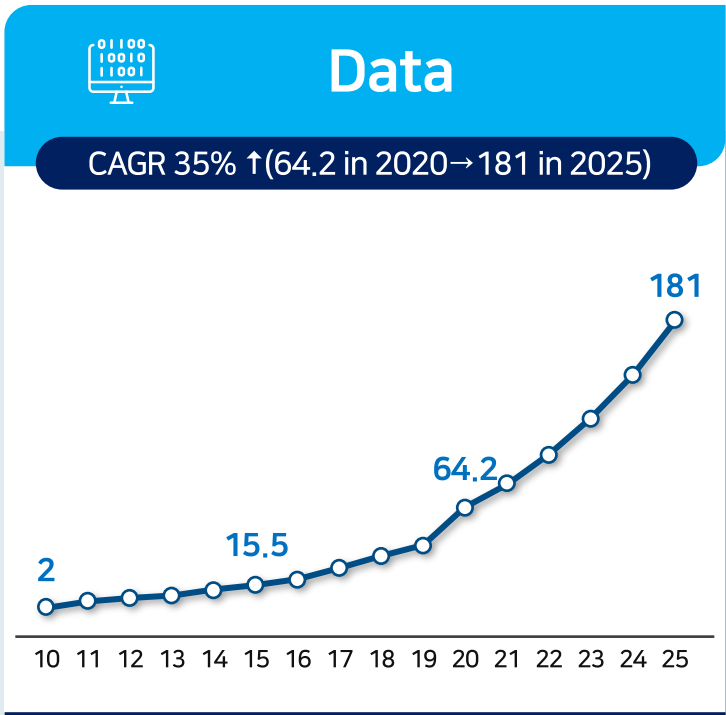

# Rise of Hyperscale AI

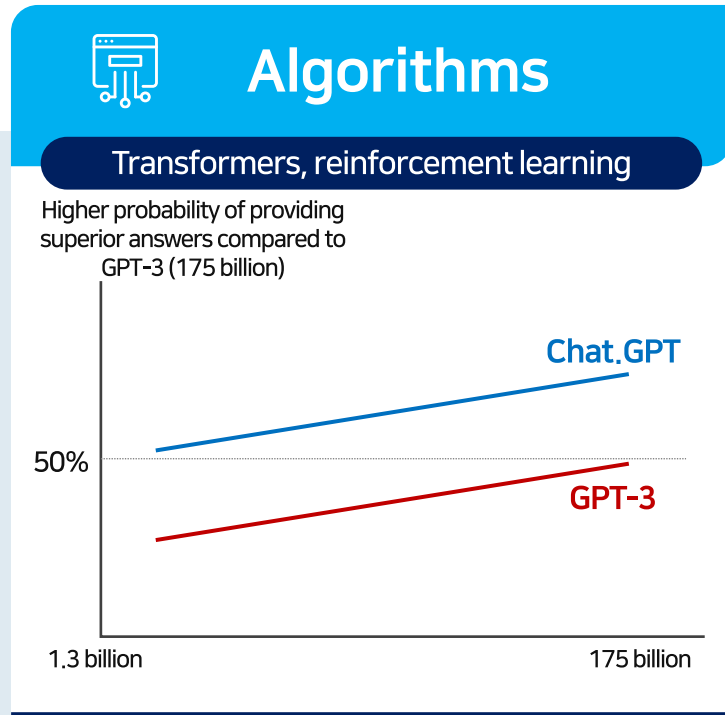

## Hyperscale AI

A generative AI model with a massive model size and extensive training data that learns the context and meaning of sentences through word relationships, and infers/generates the next word.

This achievement is based on ① **extensive data**, ② **advanced algorithms (such as transformers)**, and ③ a dramatic improvement in **computing power**.

Source: Statista (2022, ZB)

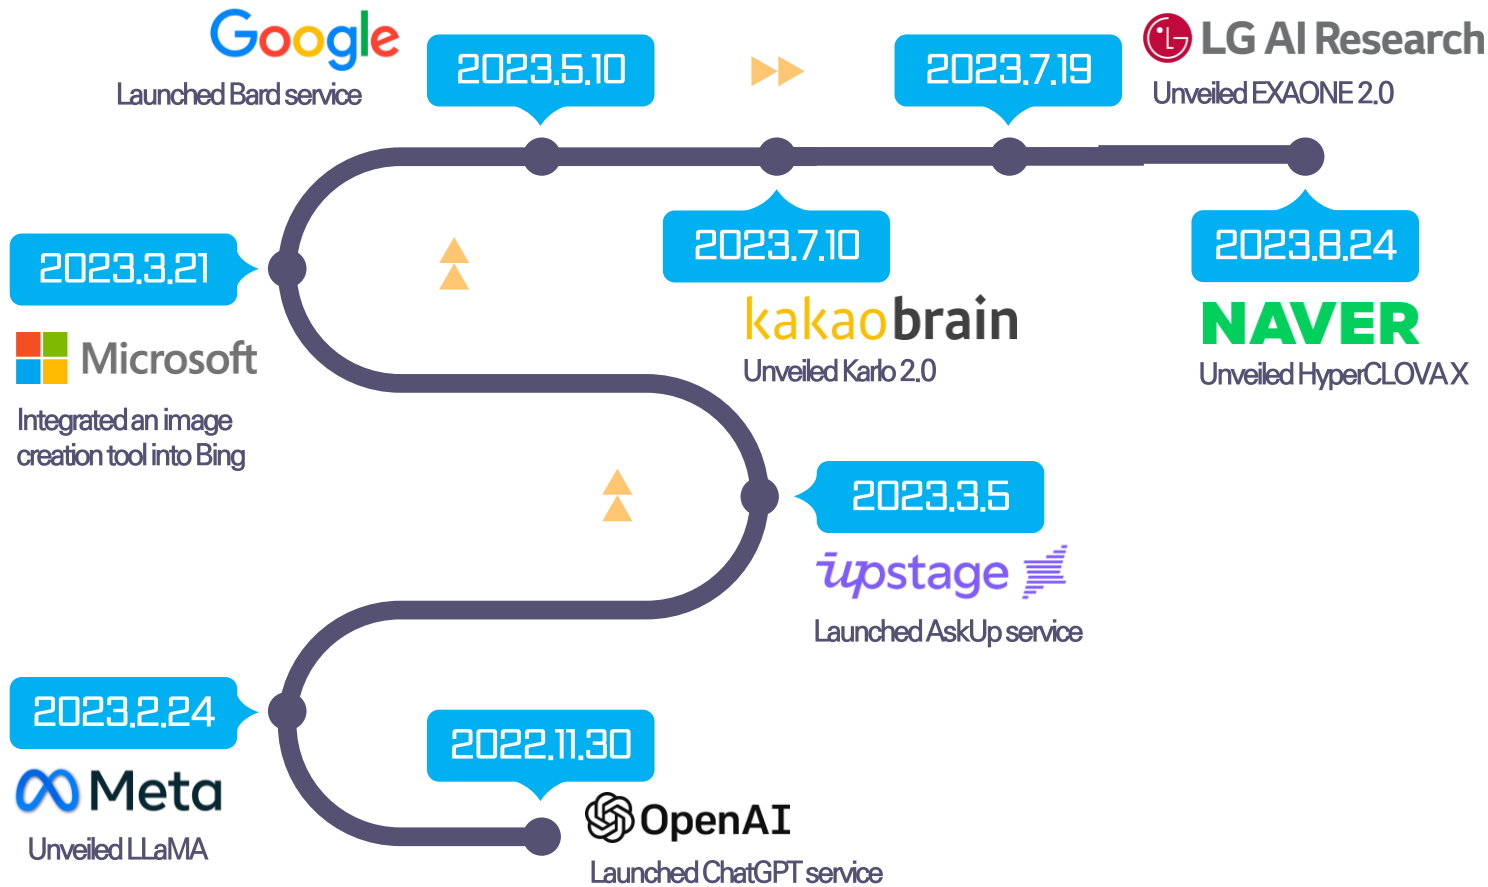

Source: OpenAI (2022)

Source: NVIDIA (2022)

# II Status of Hyperscale AI Development

More than 7 in 10 American workers “have experience using generative AI at work”

AI is readily available to all through PCs, smartphones, etc. → Signaling the normalization of AI

# Hyper-scale AI's Influence

## AI Permeating

Everyday Life and the Workplace

Google PaLM-SayCan

I spilled water

Automatic cleaning

Services Understanding Human Intentions

Revolutionizing Existing Industries

Microsoft Copilot

Document

Automatic conversion

PPT

Overwhelming Efficiency Improvement

Learning and Education Support

Naver CLOVA Note

Minutes Writing

Summary

Text-based Coding without Coding Knowledge

Creative Activities Assistance

DeepMind AlphaCode

AI achieving above-average performance at an online coding competition

※ Codeforces competition (2022)

## AI Empowering a Digital Society

- [Finance] Broad applications including customer consultation, financial product recommendations, and credit evaluations.
- [Manufacturing] Applications like defect detection, quality management, and production planning.

- Student learning tools and support for teachers' educational materials creation.
- Providing tailored education through level assessments.

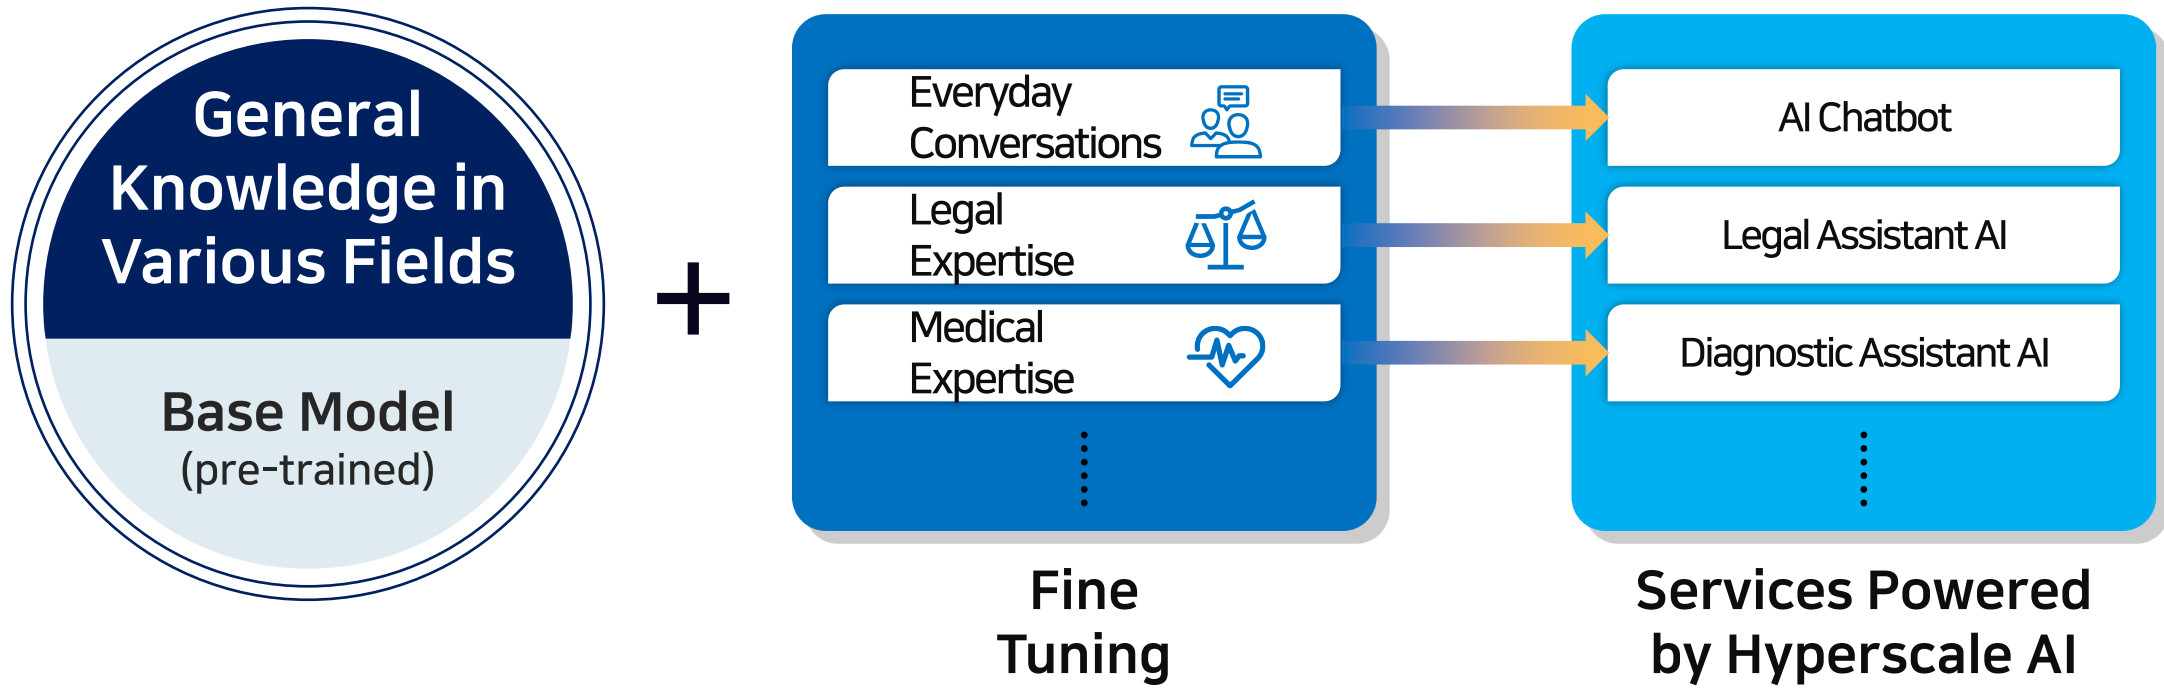

- Creating artistic works like music compositions, drawings, etc.
- Creating advertising copies, essay writing, content creation, etc.

# HyperScale AI's Influence

▶ Training hyperscale AI models with extensive expert knowledge → Infinitely expandable to all industries ◀

# III Hyperscale AI's Influence (Stanford HAI)

Hyperscale AI, leveraging human-level language and visual capabilities, significantly **expands the existing digital domain, enhancing productivity and efficiency across all industries.**

Extensive collection of controlled group data by creating 'synthetic patients' from real patient information

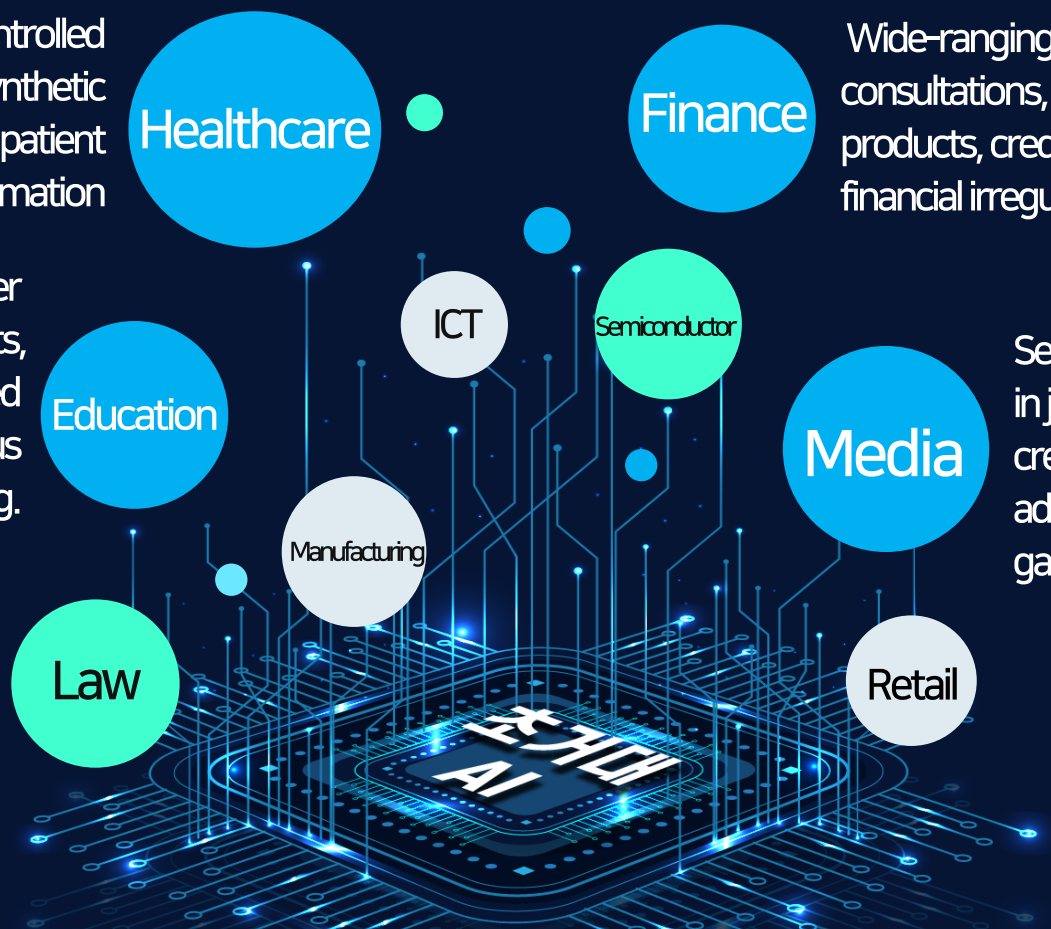

Wide-ranging applications, including customer consultations, recommendations for financial products, credit assessments, and identification of financial irregularities.

AI literacy is becoming essential to offer tailored educational services for students, along with providing individualized feedback through continuous monitoring.

Serving as a supplementary tool in journalism, enabling the creation of personalized content, addressing reader inquiries, and gathering data.

Assisting in tasks such as preparing documents for legal representatives, crafting judgments for judges, and conducting searches of legal texts and precedents.

# III Hyperscale AI's Influence (Microsoft Founder Bill Gates)

“

In my lifetime, I've seen two demonstrations of technology that struck me as **revolutionary**. The first time was when I was introduced to a Windows **graphic user interface**, and the second big surprise was the **Open AI team's artificial intelligence**.

AI will change the way **people** work, learn, get health care, and communicate with each other.

Entire **industries** will reorient around hyper-scale AI.

**Businesses** will distinguish themselves by how well they use it

”

# III Hyperscale AI's Influence (Voices of Concern)

☑ An era of ubiquitous AI: Significant concerns arise alongside the high expectations

**Technology**

### Inaccurate Answers

GO 신사임당이 누구야?

신사임당(Shin Saimdang)은 한국의 유명한 화가와 작가이자 여행자이었습니다. 15세기에 활동한 신사임당은 그녀의 그림을 소장하는 사람들이 그녀의 기술과 색채의 순수함에 감탄하며, 역사적인 가치를 가진 화가로 꼽히고 있습니다. 또한, 그녀의 시적 경험과 작품은 한국의 여성 교육과 여성의 지위 향상에 미친 영향을 평가하고 있습니다.

**Industry**

### Big Tech Dominance Leading to Potential Job Reduction

☑ Professions threatened by hyperscale AI

- Low-level coding engineers
- Content creators like journalists and writers
- Graphic designers

**Legal**

### Copyright Issues

J 중앙일보 2023.02.18. 네이버뉴스  
"내 영상 도둑질해 돈 번다" 온라인 달군 유튜버 '카피캣' 논란  
도둑 유튜버를 저격한다." 140만명이 구독하는 유튜버 '리뷰영이'는 지난 15일 이런 제목의 영상을 올렸다. 그는 '우주고양이 김춘삼(김춘삼)이란 유튜버 채널이 본인...

"유튜브 도둑질" 논란 일파만파... '콘텐츠 베끼는 방법' 강의까지  
구독자 140만 명의 과학 유튜버가 "콘텐츠 도둑이 있다"고 폭로한 뒤로 '표절 의혹'이 유튜브 전반으로 퍼지고 있습니다. 표절이 얼마나 퍼져 있는지, 초보 유튜...

**Society**

### Social Acceptance

The widespread use and integration of hyperscale AI in our daily lives (education and employment) lead to concerns. Without proper preparation, this could potentially lead to social disruption.

☑ Controversy Surrounding ChatGPT in Education

Prohibition of use for cheating VS Active use as an auxiliary tool

# IV Policy Environment (Domestic and International Trends)

## Global Evaluations

Artificial Intelligence and Democratic Values  
 Ranked **1<sup>st</sup>** place for two consecutive years (2022-23)  
(Center for AI and Digital Policy, US)

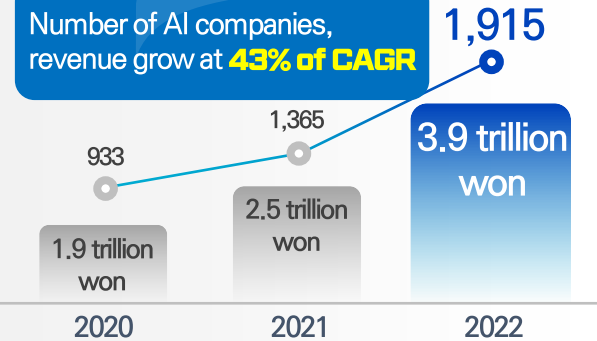

The Global AI Index 2023  
 1st: USA  
 2nd: China  
 World's **3<sup>rd</sup>** place  
 Singapore, UK, Canada, Korea  
(Tortoise Media, UK)

## Korean Companies' Endeavors

Proprietary Hyperscale AI  
**NAVER** **LG AI Research**  
**SK telecom** **kt** **kakao brain**

Startup Challenges  
**upstage**  
 rebellions\_  
 Victories in Global Competitions  
**VUNO**  
View the Invisible. Know the Unknown  
**VOINSIS**  
Voice Health Program Developer

## AI Industry Growth

## International Discussions

**EU**  
 Bills submitted to classify and regulate AI into four categories (Apr. 2021)

**US**  
 Leading AI companies agreed on voluntary safety and security measures for generative AI models (Jul. 2023)

**G7**  
 Established trustworthy AI goals and international norms concerning generative AI

**UK**  
 Summit scheduled for establishing responsible AI regulations (Nov. 2023)

## Global Governance Proposal

Direction of the New Digital Order

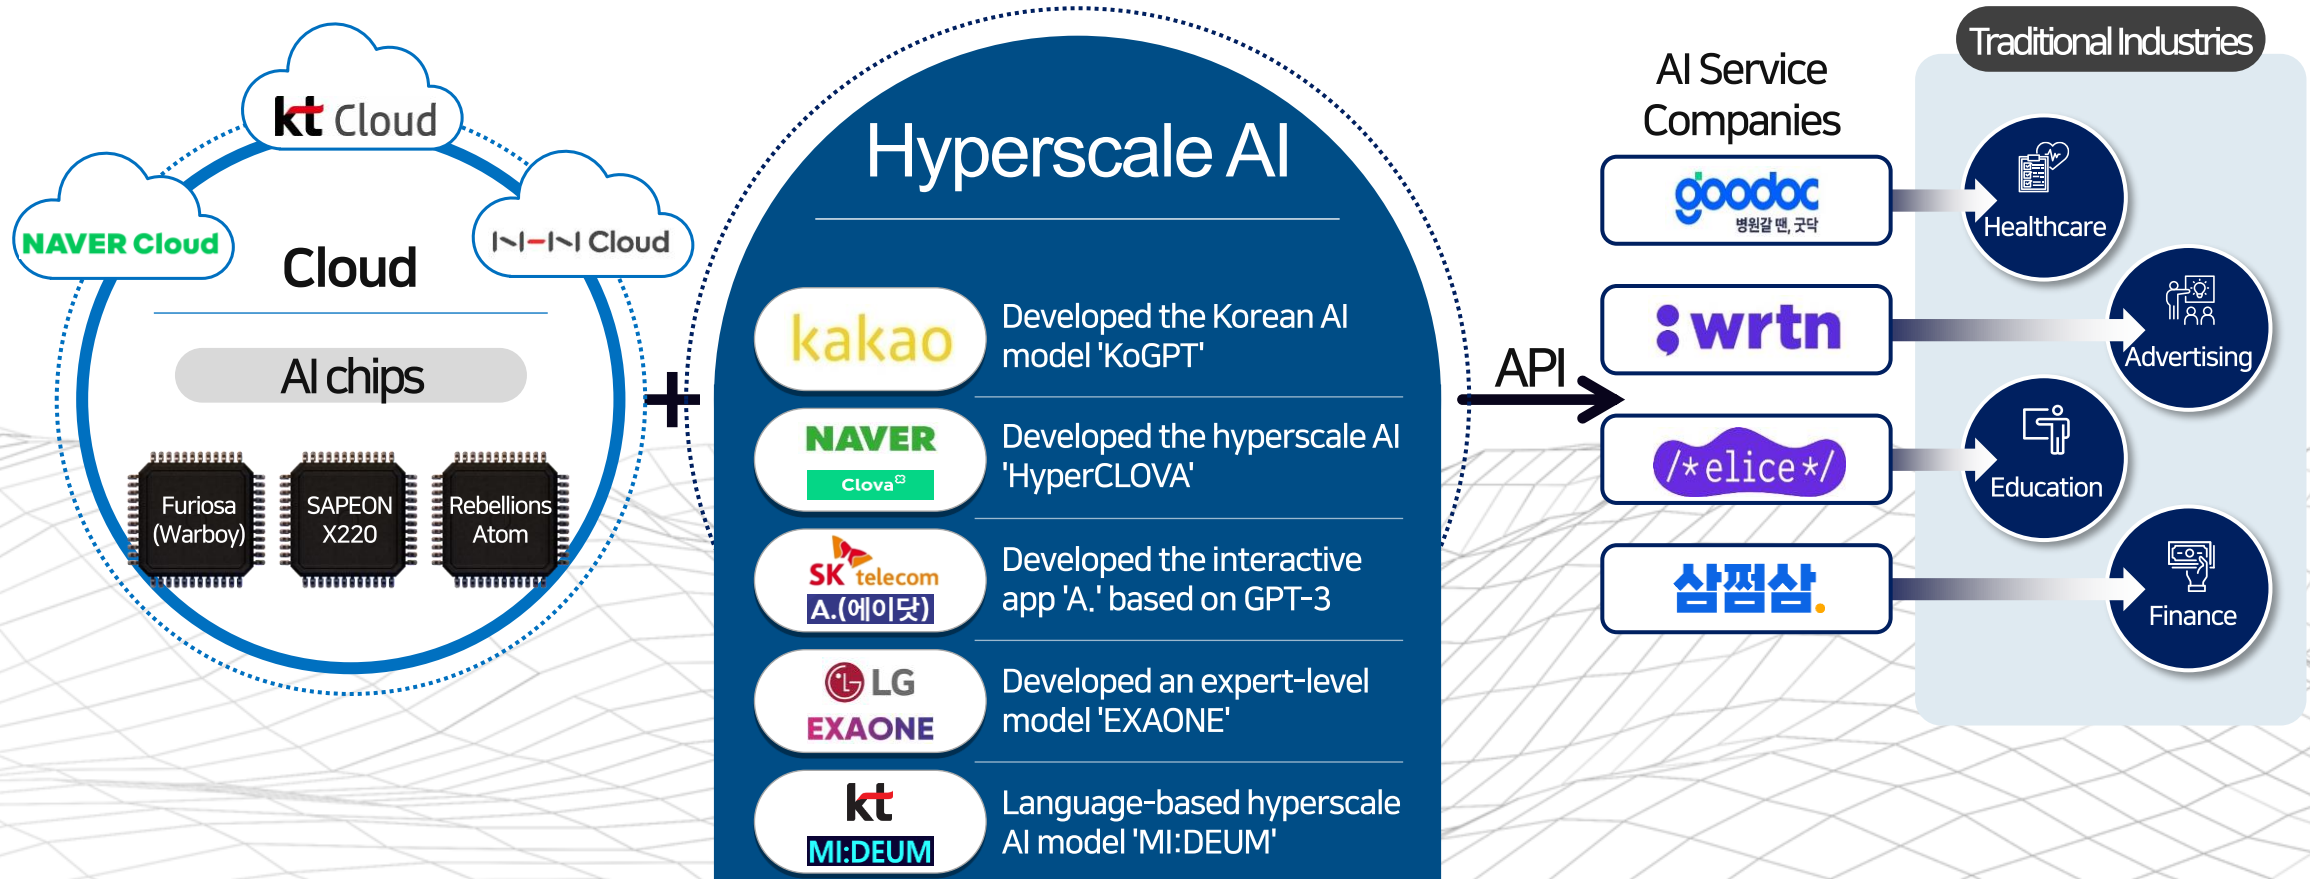

Establishment of an **international organization under the UN** for establishing digital order and regulations

# IV Policy Environment (Korea's Hyperscale AI Industry Ecosystem)

- ☑ Korean companies are now actively participating in the hyperscale AI race, starting to produce visible results.

# V Enhancing Hyperscale AI Competitiveness

Vision

Accelerating the transformation into a digital economy with smart artificial intelligence

Goals

## Hyperscale AI Platform

### Begin global market expansion

particularly among non-English speaking countries, aiming to be the top Korean-language platform

## Hyperscale AI Application Services

Foster a collaborative ecosystem between companies to **lead in specialized domains worldwide**

Implementation Strategies

1

Expanding Technical and Industrial Infrastructure for Hyperscale AI

2

Creating an Ecosystem for Hyperscale AI Innovation

3

Establishing Nationwide Institutional and Cultural Foundations

# V Strategy 1: Expanding **Technical and Industrial Infrastructure for Hyperscale AI**

## Supplement the core AI infrastructure support policy for nurturing hyperscale AI

**Data**

**Build learning data**  
centered on labeled data

**Construct core data**  
for training hyperscale AI

\* High-quality, large-scale text (200 types, equivalent to 150,000 books)

**Algorithms**

**Continue basic AI research,**  
including enhancing AI learning  
capabilities and strengthening  
reliability

**Pursue new technology development**  
to overcome hyperscale AI limitations\*

• Not reflecting the latest information and providing false answers, etc.

**Computing Infrastructure**

**Launch the K-Cloud project,**  
including the development of AI  
semiconductor technology  
and NPU Farm demonstration

**Advance core K-Cloud technology**  
for hyperscale AI utilization

\* Develop parallel/distributed processing support software,  
data processing accelerators, etc.

# V Strategy 2: Creating an Ecosystem for Hyperscale AI Innovation

## Create a hyperscale AI ecosystem led by the private sector and supported by the government

### Formation and Operation of a Hyperscale AI Council

Promote collaboration, including private investment, new service development, and overseas expansion (from 2023)

### Support for the Growth of AI Companies

#### Leading hyperscale AI projects

- ✓ Flagship hyperscale AI projects in five major private sector domains (healthcare, law, psychological counseling, content, and academia).
- Enhancing efficiency in public services, including drafting press releases and addressing citizen complaints.

#### Developing and promoting hyperscale AI-based SaaS

- Support small and medium-sized SaaS companies for the utilization of hyperscale AI models and computing resources.
- Enter into the global SaaS marketplace, providing marketing support.

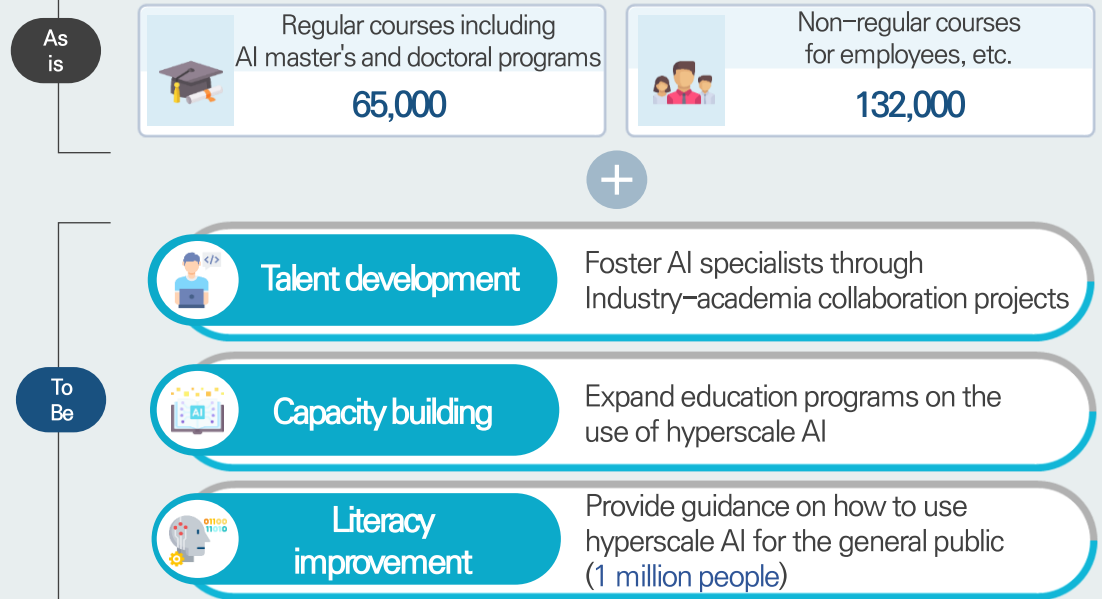

#### Dissemination of AI solutions and creation of initial demand

- Support the development of AI products and services in the commercialization stage.
- Expand AI voucher users overseas and promote convergence projects of hyperscale AI with the metaverse.

### AI Talent Development

#### ✓ Nurturing and capacity-building for hyperscale AI experts (from 2023)

Train advanced and specialized AI experts at various levels, including AI graduate courses (2023–2027)

# V Strategy 3: Establishing Nationwide Institutional and Cultural Foundations for AI Innovation

Establish a new order in the era of advanced digital technologies, such as hyperscale AI

## Increasing Societal Acceptance

- ✓ Promote voluntary participation-based evaluation of the risks and performance of hyperscale AI (from 2023)

Operation of 「Digital New Order Committee」, 「AI Legal Reform Group」, 「AI Ethics Forum」, etc.

## Improving Regulations

- ✎ Examine existing regulations from the perspective of hyperscale AI development and utilization (from 2023)

## Establishing a New Evaluation System for Reliability and Performance

- ✓ Promote voluntary participation-based evaluation of the risks and performance of hyperscale AI (from 2023)

Reliability Evaluation	Performance Evaluation
 Fairness (unbiased), transparency, etc.	 everyday conversation, specialized knowledge (law, science, history, etc.)

Lay the foundation for becoming a digital leader by engaging public discourse across diverse societal sectors

# VI Promoting AI Normalization among All Citizens

Vision

## Propelling Korea to become the global leader in AI utilization.

Goals

Addressing livelihood issues and improving the quality of people's lives

Generating extensive demand for AI and strengthening the competitiveness of the AI industry

Implementation Strategies

**Citizens' Lives**  
(Everyday Life)

We will enrich citizens' lives with AI.

Welfare

Health

Childcare /Education

Culture/Arts

**Industrial Sites**  
(Workplaces)

We will innovate industries and workplaces by integrating AI.

Specialized Professions

Farmers

Small Businesses

Enterprises

**Public Administration**  
(Public Sector)

We will establish a smart government that most effectively utilizes AI.

Public Services

Citizen Safety

Administrative Tasks

Improving AI Literacy

## We will proactively establish the foundation for AI normalization.

Ensuring AI Ethics and Reliability

# VI Strategy 1: Enriching Citizens' Lives

Addressing societal issues and **sharing digital benefits** with citizens through AI

## Welfare

### Seniors living alone

Using AI speakers for health management at 261 nationwide health centers

### At-risk households

Providing AI initial counseling service by proactively identifying at-risk households

### Persons with disabilities

Offering rehabilitation and exercise coaching for the disabled, along with smart glasses for the hearing impaired

## Healthcare

Introducing AI for disease diagnosis in public hospitals. Developing AI that predicts infectious disease spread.

## Childcare, Education

Establishing a meal management system and introducing AI digital textbooks

## Culture, Arts

Employing AI curator robots, digital idols, musician restoration, etc.

# VI Strategy 2: Innovation in Industrial Sites and Workplaces

## Leading in the integration of hyperscale AI in private sector domains

### Law

Drafting litigation documents and searching legal texts

### Healthcare

Creating medical records and suggesting treatment methods

### Psychology

Providing mental health counseling and diagnosis

### Content

Creating images, audio, etc.

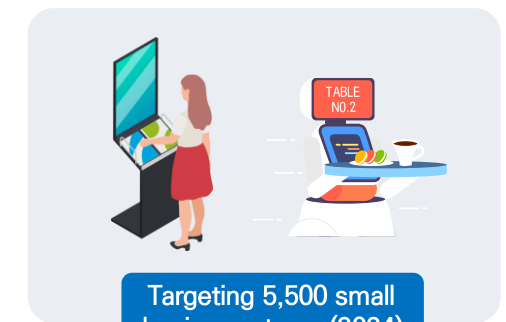

### Academia

Reviewing and summarizing papers

## Assisting Small Businesses in Using AI

Targeting 200 service businesses like salons and fitness centers (2024)

Targeting 5,500 small business stores (2024)

## Reducing the Labor Burden of Farmers and Fishermen and Promoting Healthy Food Production

### Farmers

Pest diagnosis and prescription information service

Greenhouse and livestock facility management AI (by 2025)

### Fishermen

Constructing smart fish farms (by 2026)

\* 1 in 2023 → 6 in 2026

## Accelerating the Dissemination of AI Revolutionizing Industrial Production

### Developing and demonstrating AI for innovation across industries

#### Robotics

Automated quality control using AI-driven robots

#### Logistics

Order forecasts and same-day delivery

#### Bio, Pharmaceuticals

Discovering therapeutics and new drug candidates

#### Steel

Energy conservation through increased process efficiency

#### Materials, Chemicals

Developing AI-based new materials via raw material blending, etc.

#### Smart Home

Activating lighting and door locks through human voice commands

VI

# Strategy 3: Establishing a Smart Government that Most Effectively Utilizes AI

## Delivering high-quality public services to citizens

### Water, Food

Constructing AI-powered water purification plants  
Analyzing and predicting the risks associated with imported food products

### Weather

Developing AI for short-term and ultra-short-term precipitation forecasts, as well as predictions for heatwaves, strong winds, and heavy rainfall

### Jobs

Offering job information and 24-hour online vocational counseling services

### Administrative Inquiries

Providing AI-powered responses for public inquiries

## Ensuring citizen safety through disaster and accident response

### Wildfire

Real-time AI-based wildfire monitoring system  
4 in 2023 → 50 in 2027

### Floods

Establishing and operating an AI-based flood forecasting platform Targeting 223 locations nationwide

### Intelligent Control

AI-based intelligent control system  
32% in 2023 → 100% in 2027

### Report Response

Developing a 119 report response AI platform

## Increasing work efficiency in public organizations

### Patent

Establishing and utilizing a patent-exclusive hyperscale AI language model

### Forest Protection

Developing and demonstrating an AI solution for early detection and prediction of pest outbreaks

### Customs

Developing and demonstrating an automated AI-based X-Ray image screening system

### Statistics, Industry Classification

Automating national statistics classification tasks using AI

(Mapping the responded text into classification codes)

# VI Strategy 4: Proactively Establishing the Foundation for AI Normalization

## Improving AI Literacy

Conducting AI literacy education for elementary, middle, and high school students

Elementary school students

Extending hours of IT (AI & software) classes

Middle school students

Operating leading AI schools

Strengthening practical AI skills for college students, job seekers, and employees

College students

Expanding 'Software-Centric Universities' from 51 to 58

Job seekers, workers

Supporting AI education and certification acquisition

Educating the general public on everyday AI products and services

Elderly

Operating 226 AI Experience Zones in collaboration with local governments

Youth

Providing education on drawing, music creation, and office software using AI

## Strengthening AI Ethics and Reliability

### 1 AI Legislation

Balanced achievement of AI industry growth and trust

▶ Supporting the establishment of the Artificial Intelligence Act

### 2 Reliability Testing and Certification

Supporting private-led self-regulated testing and certification systems and pilot certification (2023)

▶ Conducting testing and certification for AI in high-risk areas (2024)

### 3 Guidelines

Expanding reliable development guides by sector

▶ Developing tailored development guides for generative AI, high-risk areas, etc.

### 4 Reliability R&D

False answers (hallucination) and unethical expressions

▶ Promoting R&D to overcome AI limitations

THANK YOU
